The Identity & Payments Summit attendees represent every section of the identity, access, and payments industries. Our membership and non-member attendees come from systems manufacturers, integrators, government agencies, global payment networks, processors, identity solution providers, relying parties, issuing banks, merchant banks, industry suppliers, merchants, etc. In each of these categories, we have organizations of all sizes – such as very large merchants to small, single location stores. The same is true for financial institutions – some are global banks and others are regional, or credit unions focused on a vertical market. In addition to systems providers delivering identity and access solutions, we have relying parties that work with the issued credentials. Attendees also represent companies that are technology or solutions providers that work with companies in the broad identity or payments ecosystem. Titles range from C-suite executives to operations management, to marketing, to product management and engineering. Alliance working committees have a cross-section of subject matter experts representing every aspect of identity, access, and payments challenges and best practices.
